Hi Danbee,

I've answered your questions below.

Best,

Alex

Ah, amazing!!

Ok, for the workshop I will need to know the following:

- how much space do you need?

5x5m for the labyrinth to be laid on the floor

- is there anything you need for your workshop that you are not bringing/providing yourselves?

We may need some assistance in rigging the camera. I think it might be sensible for me and/or Michael to do a recce before the event.

- what are the health & safety considerations for your workshop?

I guess there's a risk that people could lose their balance and fall over. We should maybe make this clear to anyone who's going to give it a try.

- what is the title of your workshop?

An Allocentric View of Movement: Experimenting with perspectival shifts in VR

- will you need reimbursements for travel and/or consumables?

Yes, we'll need to cover the cost of transporting the equipment and labyrinth floor. Should be able to fit it all in a large taxi.

- we have a modest budget available for honorariums for workshop leaders and performers. will you be both performing and co-leading the workshop with Fiona and Michael?

Fiona and I will be leading the workshop. Michael is there for technical assistance. It would be great if all three of us could get honorariums.

For the performance, I will be writing up a script this weekend, and I'll include you in the email when I share it with the others involved in the first performance ("Overstanding Upside-down"). In the meanwhile, I'll email-introduce you to the other performers :)

Excellent, so pleased to have you!!

Cheers,
Danbee

Hi Danbee,

So sorry not to get back to you sooner. I've been at a conference and was busy preparing my presentation this morning. I hope this doesn't reach you too late....

I am still very interested in being part of Dear Neuroscience apologise for not having formally submitted an application. Fiona and Michael from the Bartlett are both available and interested to present the Allocentric VR experiment and I'd be happy to participate in the 'performance' with you. Just let me know what you need and I'll get it to you asap.

All the best,

Alex
